

INNOVATION

INNOVAZIONE

LIFT-TEK ELECAR crede nell'importanza dell'innovazione tecnologica, ne percorre la strada e ne raccoglie i frutti. L'introduzione di moderni sistemi CAD e di sistemi di gestione digitale della produzione sono fondamentali per il successo di un'azienda. Possiamo sviluppare prodotti speciali con la stessa velocità dei prodotti di serie.

Siamo in grado di simulare assemblaggi e modificare in tempo utile il progetto senza ricadute economiche negative. E' ormai normale visualizzare virtualmente l'integrazione del sollevatore nel carrello elevatorio evitando rischi di errori. Progettiamo sollevatori più compatti e con elevate caratteristiche strutturali e di portata. Possiamo presentare ai clienti prodotti virtuali ricchi di particolari, modificarli in tempo reale, eseguire brevi simulazioni di processo, è un approccio propositivo con il cliente. Riusciamo a

At LIFT-TEK ELECAR we believe in the importance of technological innovation, we follow this path and harvest the good results. Investing in up-to-date CAD software programmes and in digital operating systems is essential for business success. We can develop specialised products as quickly as series products. We can simulate products' assembling and carry out design changes with positive economic effects.

Presently LIFT-TEK ELECAR

It is now our standard procedure to virtually represent the integration of the mast on the lift truck, avoiding the risk of mistakes. We develop and design very compact masts with the highest structural and capacity characteristics.

We are able to show virtual, highly detailed products, modify them in real time and perform some short process simulations: All this – we believe – is beneficial to establish a constructive approach to our

QUALITY

Il Sistema Qualità di LIFT-TEK ELECAR soddisfa richieste tecnologiche impensabili fino a qualche anno fa. Questo è possibile perché siamo in possesso di tecnologie CAD di ultima generazione.

Oggi LIFT-TEK ELECAR si pone in prima linea nella ricerca dell'innovazione che ha portato a soluzioni integralmente elettriche particolarmente indicate nell'industria alimentare.

customers. We are now able to meet customers' technological requests, which were unconceivable until a few years ago. This is all possible because we can count on an up-to-date CAD technological support.

Presently LIFT-TEK ELECAR

are in the front line of innovation research, which has lead us to explore and develop completely electrical mast solutions particularly used in the food industry.

Il Sistema Qualità di LIFT-TEK ELECAR è inoltre conforme allo standard ISO 14001 per la gestione ambientale nel rispetto delle norme internazionali.

Infine LIFT-TEK ELECAR

nell'ambito della produzione di gruppi di sollevamento e piattaforme per lo spostamento di merci. A completamento della produzione standard realizza una serie di sollevatori per applicazioni specifiche, commissionate dal cliente.

The LIFT-TEK ELECAR Quality System, covering the design, production and sales of lift masts and attachments for lift trucks and other goods lift and handling systems, is certified according to the ISO 9001 standard. Quality in the processes and in the products

development make LIFT-TEK ELECAR one of the best companies in the sector of lift solutions for the lift trucks market.

Il Sistema Qualità di LIFT-TEK ELECAR è inoltre conforme allo standard ISO 14001 per la gestione ambientale nel rispetto delle norme internazionali. Infine LIFT-TEK ELECAR nell'ambito della produzione di gruppi di sollevamento e piattaforme per lo spostamento di merci. A completamento della produzione standard realizza una serie di sollevatori per applicazioni specifiche, commissionate dal cliente.

At LIFT-TEK ELECAR we design and produce a comprehensive range of masts and integrated attachments for any kind of application. Our vast range of products includes 1 to 5 stage mast versions, which can reach 15 metres high and lift up to 52 tons.

Also, our masts work thanks to oil hydraulic cylinders, which are designed and produced in our factory.

Through the two plants in Castel San Giovanni (Piacenza, Italy) and Westminster (South Carolina, USA), we mainly offer our products to the world major manufacturers of lift trucks, as well as to the material handling world. We complete our standard range of products with a vast range of customised masts for specific applications and produced on customers' demand.

Il Sistema Qualità di LIFT-TEK ELECAR è inoltre conforme allo standard ISO 14001 per la gestione ambientale nel rispetto delle norme internazionali.

Finally, LIFT-TEK ELECAR for the production of lift masts and attachments is also certified by the International Institute of Welding in conformity with the ISO 3834 standard.

The International Institute of Welding

certified according to the ISO 9001, ISO 14000 and EN ISO 3834-2 regulations.

SOLLEVATORI LIFT-TEK ELECAR

LIFT-TEK ELECAR progetta e realizza montanti per carrelli elevatori su misura: realizziamo le migliori soluzioni per rendere più efficiente, efficace e sicuro il vostro lavoro di movimentazione merci. Sollevatori idraulici, meccanici, elettronici e telescopici in grado di rendere i carrelli elevatori altamente performanti. La logica che guida la nostra ricerca è quella di realizzare prodotti per il sollevamento delle merci che semplifichino le attività di magazzino e logistica. Gli impianti di sollevamento LIFT-TEK ELECAR sono applicabili ai muletti e ai carrelli elevatori di qualsiasi dimensione e portata di carico. Il sollevamento delle merci e la movimentazione dei carichi sono infatti attività delicate e centrali per ogni azienda che debba gestire processi di magazzino e stoccaggio nello sviluppo del proprio lavoro. È quindi necessario dotarsi di attrezature per il sollevamento delle merci che siano affidabili, sicure e resistenti. Scegliere LIFT-TEK ELECAR significa privilegiare piattaforme per il sollevamento innovativa, agili e altamente tecnologiche.

LIFT-TEK ELECAR MASTS

LIFT-TEK ELECAR design and produce customised masts for the fork truck industry. We create the best solutions to make your materials handling more efficient, cost effective and safer. Both loads lifted and materials handling are indeed delicate and key activities for the correct work development of any Company working in market, è necessario dotarsi di attrezature integrate che possano assicurare all'attività industriale di logistica e stoccaggio un alto livello di performance. The aim behind our research is to design masts for the material handling industry, which can ease your warehouse and logistics stacking activities.

Tipologia di sfilamento da Mono a Quintuplex

Mast type from Mono to Quintuplex

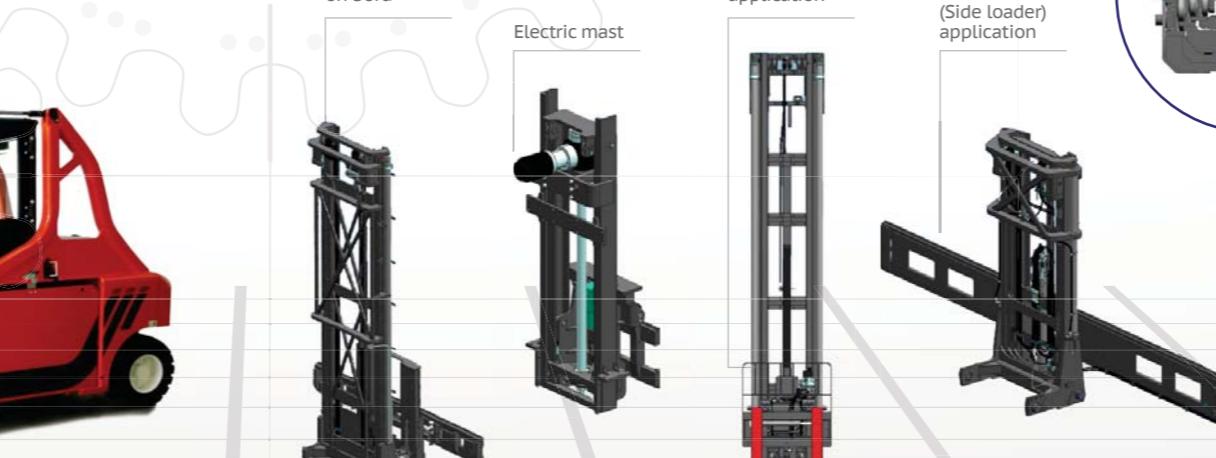

LIFT-TEK ELECAR MASTS

Lift-tek Elecar lift mast products can be fitted to fork trucks of any dimensions and load capacity. In un'ottica di gestione del magazzino time to work more efficient, cost effective and safer. Our hydraulic, mechanical, electric and telescopic uprights are able to increase significantly your fork lifts performance. The aim behind our research is to design masts for the material handling industry, which can ease your warehouse and logistics stacking activities.
