# "End 2 End" System

The return chain offers high excursions with large side movements and positionings including independent positioning for every kind of configuration

# The reason for an End2End?

- The increasing number of requirements for special application
- The tighter collaboration with the final customer.

In compliance with the lift trucks' standards and recommendations, there is the increasing request to approach the load in places quite difficult to reach using traditional systems.

- **LIFT-TEK ELCAR S.p.A.**
